

# Redang Island

Redang archipelago comprises 9 islands. Redang Island which is approximately 7km in length 6km in width, is the largest of all other islands in the Marine Park. This archipelago is abounds with marvelous marine fishes, turtles and coral reefs, ensuring a great snorkelling and scuba-diving experience.

The Redang archipelago has been designated as Marine Parks Malaysia as to conserve the islands' unique ecosystem. There are 500 species of live corals, more than a thousand species of invertebrates and almost 3000 species of fishes which includes manta rays, stingrays, sharks and whale sharks, all living in harmony in the reefs fringing the islands. It is a real heaven for divers.

Diving enthusiasts and underwater photographers will definitely be entranced by the sights of the islands, which are ranked among the best coral reef in the world. Redang waters also contains two historic shipwrecks. The H.M.S Prince of Wales and H.M.S. Repulse were sunk here during the WWII, setting the stage for the Japanese occupation of Malaya.
