

Agrotourism

Malaysia, a tropical paradise comprising 13 states and three Federal Territories, is home to 27 million people and boasts diverse cultures as well as an impressive range of flora and fauna. Its equatorial climate ensures that it is always warm, sunny and seldom without rain for long. This land of perpetual green has been named as one of the world's 17 mega diverse countries, sheltering various plant and animal species that are found nowhere else.

Endowed with fertile land that is ideal for farming, Malaysia is the perfect destination for agrotourism. Agrotourism offers a unique vacation where you can explore places, especially the rustic countryside and experience agricultural life first hand, whether it is harvesting crops alongside farmers or hauling in the day's catch with fishermen. Go for day trips to kampongs, orchards, farms, fishing villages or take part in a homestay programme for a true taste of local lifestyle and hospitality.

For a memorable holiday, visit Malaysia and discover its agrotourism wonders.
